## **Bridge Engineer (Vietnamese nationality only)**

### **About NashTech**

NashTech is part of Harvey Nash Group. We enable innovative business and digital transformation through IT services spanning Advisory, Software, Business Processes and Infrastructure. It operates globally to support organizations with both outsourcing and consultancy requirements. It also covers all development languages such as NET, Java, C#, HTML.

The company is also leading the way with advanced technologies such as AI (artificial intelligence) and blockchain. In addition to already developing an application that incorporates AI, we have also started to develop a recruitment system for blockchain. In collaboration with companies in other industries, we are also working on new non-financial use cases.
